Big Decline in Kansas Production

From the mid-continent production figures for the week ended July 2, it will be noted that the Kansas production is off about 2,000 barrels for the week, but from the big wells coming in the outside Oklahoma fields, the mid-continent production has only declined about 200 barrels, and of course does not include the new wells coming in which have been brought in in the best district, the latter part of this week nor the big well of the MacLean Refining company in the Ponca field.

The bringing in of the big wells in the Tulsa district should increase the outside Oklahoma production several thousand barrels next week and it will be an interesting feature to watch. The figures are as follows:

	Buckets
Cushing	29,200
Yale	10,000
Huntington	11,200
Healdton	2,000
Outside Oklahoma	181,800
Total Oklahoma	197,200
Kansas	82,000
Total mid-continent	279,000

Operations in Stephens County, Oklahoma

Special to the World
DUNCAN, Okla., July 24.—Drilling operations in Stephens county were practically demoralized this week by the heaviest rains of the season, bursting the reservoir dams and leaving many wells without water. More than seven inches of water pouring down in less than four hours. Most of the damage has been made good and all of the drills made ready and all the wells in the washouts will be put in pumping shape by the first of next week.

Despite these unfavorable conditions and adversities several new locations have been made and wells will be spudded in at once. Some of the rigs did not suffer loss any way and keep on sending the drifts toward the deep sandstone areas of the oil and reveal to the outside world that Stephens county territory's deepest oil well is in the Burkhardt or Ranger area boasted of.

It's very true that this particular oil area never had a real deep test made in its confines. Shallow sand is all that any company ever drilled to. This sand has proved prolific enough to yield anywhere from 15 to 200 barrels or more despite the shallow depth at which it was and is encountered.

The fields of Stephens county are yielding more than 2,500 barrels every day. Production is steadily increasing each week and will con-

tinuing indicate that it will make 3,000 barrels with the bit only started into the sand. The well is being shut in to 10 barrels an hour and cannot be opened up until next week when leakage capacity can be provided.

Ichthy Found in Crude Oil From Tatum Territory

A sample of oil furnished by H. J. Baker of the Arkansas Laboratories company, Tulsa, Okla., to the Tulsa Refineries has been sent on the east coast of the country in the Mississippi River company, "Sulphur," to determine if it is being used in tank cars.

Tank cars carrying crude oil from the Magnolia refinery to the Tulsa market made some 200 trips last week to the refineries. The market will be petroleumized at about 60 per cent.

The Tulsa oil engineers had a conference at the hotel here with gas well operators in the Tulsa area and learned that the gas for the week, but from the big wells coming in the outside Oklahoma fields, the mid-continent production has only declined about 200 barrels, and of course does not include the new wells coming in which have been brought in in the best district, the latter part of this week nor the big well of the MacLean Refining company in the Ponca field.

The bringing in of the big wells in the Tulsa district should increase the outside Oklahoma production several thousand barrels next week and it will be an interesting feature to watch. The figures are as follows:

	Buckets
Cushing	29,200
Yale	10,000
Huntington	11,200
Healdton	2,000
Outside Oklahoma	181,800
Total Oklahoma	197,200
Kansas	82,000
Total mid-continent	279,000

Standard Raises Price of Kerosene in New York

The Standard oil company of New York has raised the price of kerosene 1 cent a gallon to 14 cents tank wagon basis in lower New York state and Connecticut. The price of gasoline in this territory is unchanged. This price advance on kerosene has been made general by marketers in the eastern territory—Oil and Gas News.

Big Producers at Beggs

The past week has been an interesting one in the Beggs district, especially the new pool which was opened by E. H. Black and others in 12-14-11, with the bringing in the Condron's big well, which was good for 1,100 barrels. The Iron Mountain oil company's well is good for 100 barrels and the well of Perry and French both in 12-14-11 was good for 100 barrels. This indeed makes this field look very interesting and a great deal of speculation is going on as to just how large a pool it is going to be and whether there is a chance for it to connect up with the big pool in sections 6 and 14-12. From the map it would appear that there doesn't seem to be much chance for it to connect up and it looks as though it will be mostly confined to section 12 and it may possibly extend over into the neighboring section.

In the Wilcox pool in sections 13 and 15-11 there are about 50 rigs up and drilling wells and makes this one of the most active spots in Oklahoma.

The Jonet Gasoline company is drilling a test at 1,500 feet in No. 3 Joe Friday in 10-15-11.

Empire to Connect With Roxana's Yarhola Line

The Empire Gas & Fuel Co.'s pipe line which is being built from Burkhardt in Healdton will connect with the Roxana Petroleum company's Yarhola line from Healdton to Cushing. This connection will make available a chance to drill in their wells.

Marland's Well Better Than First Report

Attention清淡的 gasoline producers. It is a proven fact that cold water pumped over your coils will increase your production 10 per cent. We are prepared to drill your water wells on short notice. Parker & Green Drilling Co., Mounds, Oklahoma.—Adv.

Drilling Contract—Will give up divided three-fourths interest ten-acre commercial oil lease in Tulsa county for complete well about sixteen hundred feet above thirty-four sand. Address P. O. Box 121—Adv.

Kansas drilling contract offers liberal block to well in Greenwood or Lynch county. See C. E. McDonald, 505 Kennedy, Address C. O. Edwards, P. O. Box 112, Wichita, Kan.—Adv.

For lease by owner for oil and gas, W. 1/2 of N. W. 1/4 of section 2-13-8 and E. 1/2 of N. E. 1/4 of section 3-13-8. Production 1/2 miles north in 23-14-8. Phones 8180 or 6916. P. O. Box 1390.—Adv.

Safest bet in the oil business. If a rock, you can lose. A royalty is a fixed return on every barrel oil the mother earth produces. For full particulars write P. O. Box 522—Adv.

Have cash ready to buy fee land and oil royalties. Give full particulars, with age of wells, income from last year, price, etc. Address P. O. Box 88, Tulsa.—Adv.

Experienced casing head engineer wants position. Write me older pumping job. Adv. reference. Address 1411, World—Adv.

To let drilling contract—10,000 acres in Texas, deep test quick action, room 412 Daniel bldg., Tulsa, Okla. Phone 4887—Adv.

Fifty-acre Kentucky leases, five cents per acre. Rentals, 25 cents per annum. Address Box 288, Republic, Oklahoma.—Adv.

Meter charts figured and checked Gas measurements of all kinds. Ad dress Box 520, Tulsa, Okla. Phone 7550—Adv.

R. B. Martin, casing head, gas testing, absorption, compression mech. oda. Phone 6267—Adv.

TULSA Machine & Tool Co., Inc.
General Contract Machine Work, Gasoline and Steam Engines, Overhead Lifting, Cylinder Rebuilding, Machining, Welding, Acetylene, Welding, Blacksmithing.

We are sole manufacturers of parts for O.E.C. Single and Double Disc Pump and P.O. Powers and O.K. Steam and P.O. We have a complete Machining plant for your work. We repair and make anything. Phone 315-117 E. 1st. Phone 7089-318
